IT'S YOUR BODY
Luxura
by Hapro

X_S X₂

Body Beautiful

The Luxura x_5 and Luxura x_7 . Works of art for your studio. The design reflects the inner values of an innovative concept, in which high-tech and beauty undergo complete symbiosis. The highly attractive Luxura elegance gives its all for the sake of the ideal of beauty. Luxura x_5 and x_7 represent the attractive highlight for your studio's atmosphere. Luxury for your image.

x_5 x_7

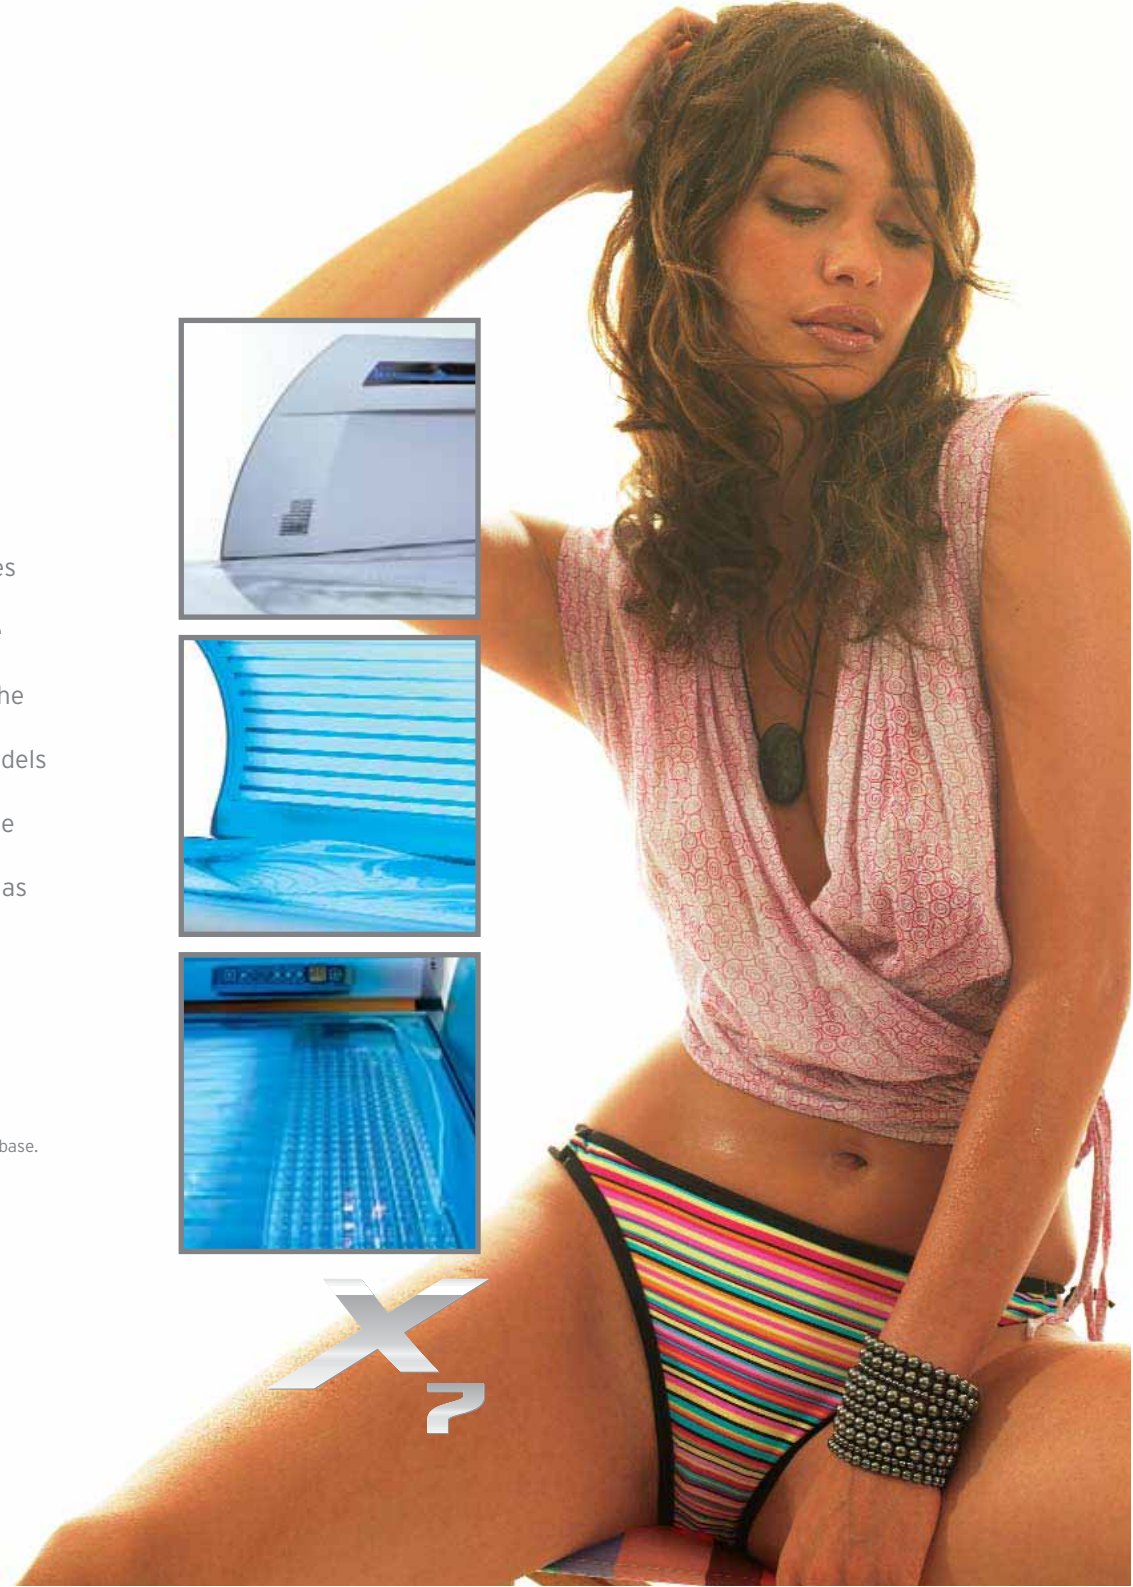

Luxura x₇: With Many Extra Features

If you are interested in wellness, you are the kind of person who likes to treat himself to some luxury now and then. After all, you deserve to spoil yourself with something unusual. Which is why, right from the start, Hapro designed the Luxura x₇ sunbed – including different models with 38-42 tubes – with a number of attractive extra features. These include a screen between top and base, finished in the same colour as the sunbed itself. And then there is the backFlex shoulder tanner*. And the head and body cooler. And much more besides.

* Not included in the 40- and 42-tube models, which are equipped with XL-Light technology in the base.

x₇

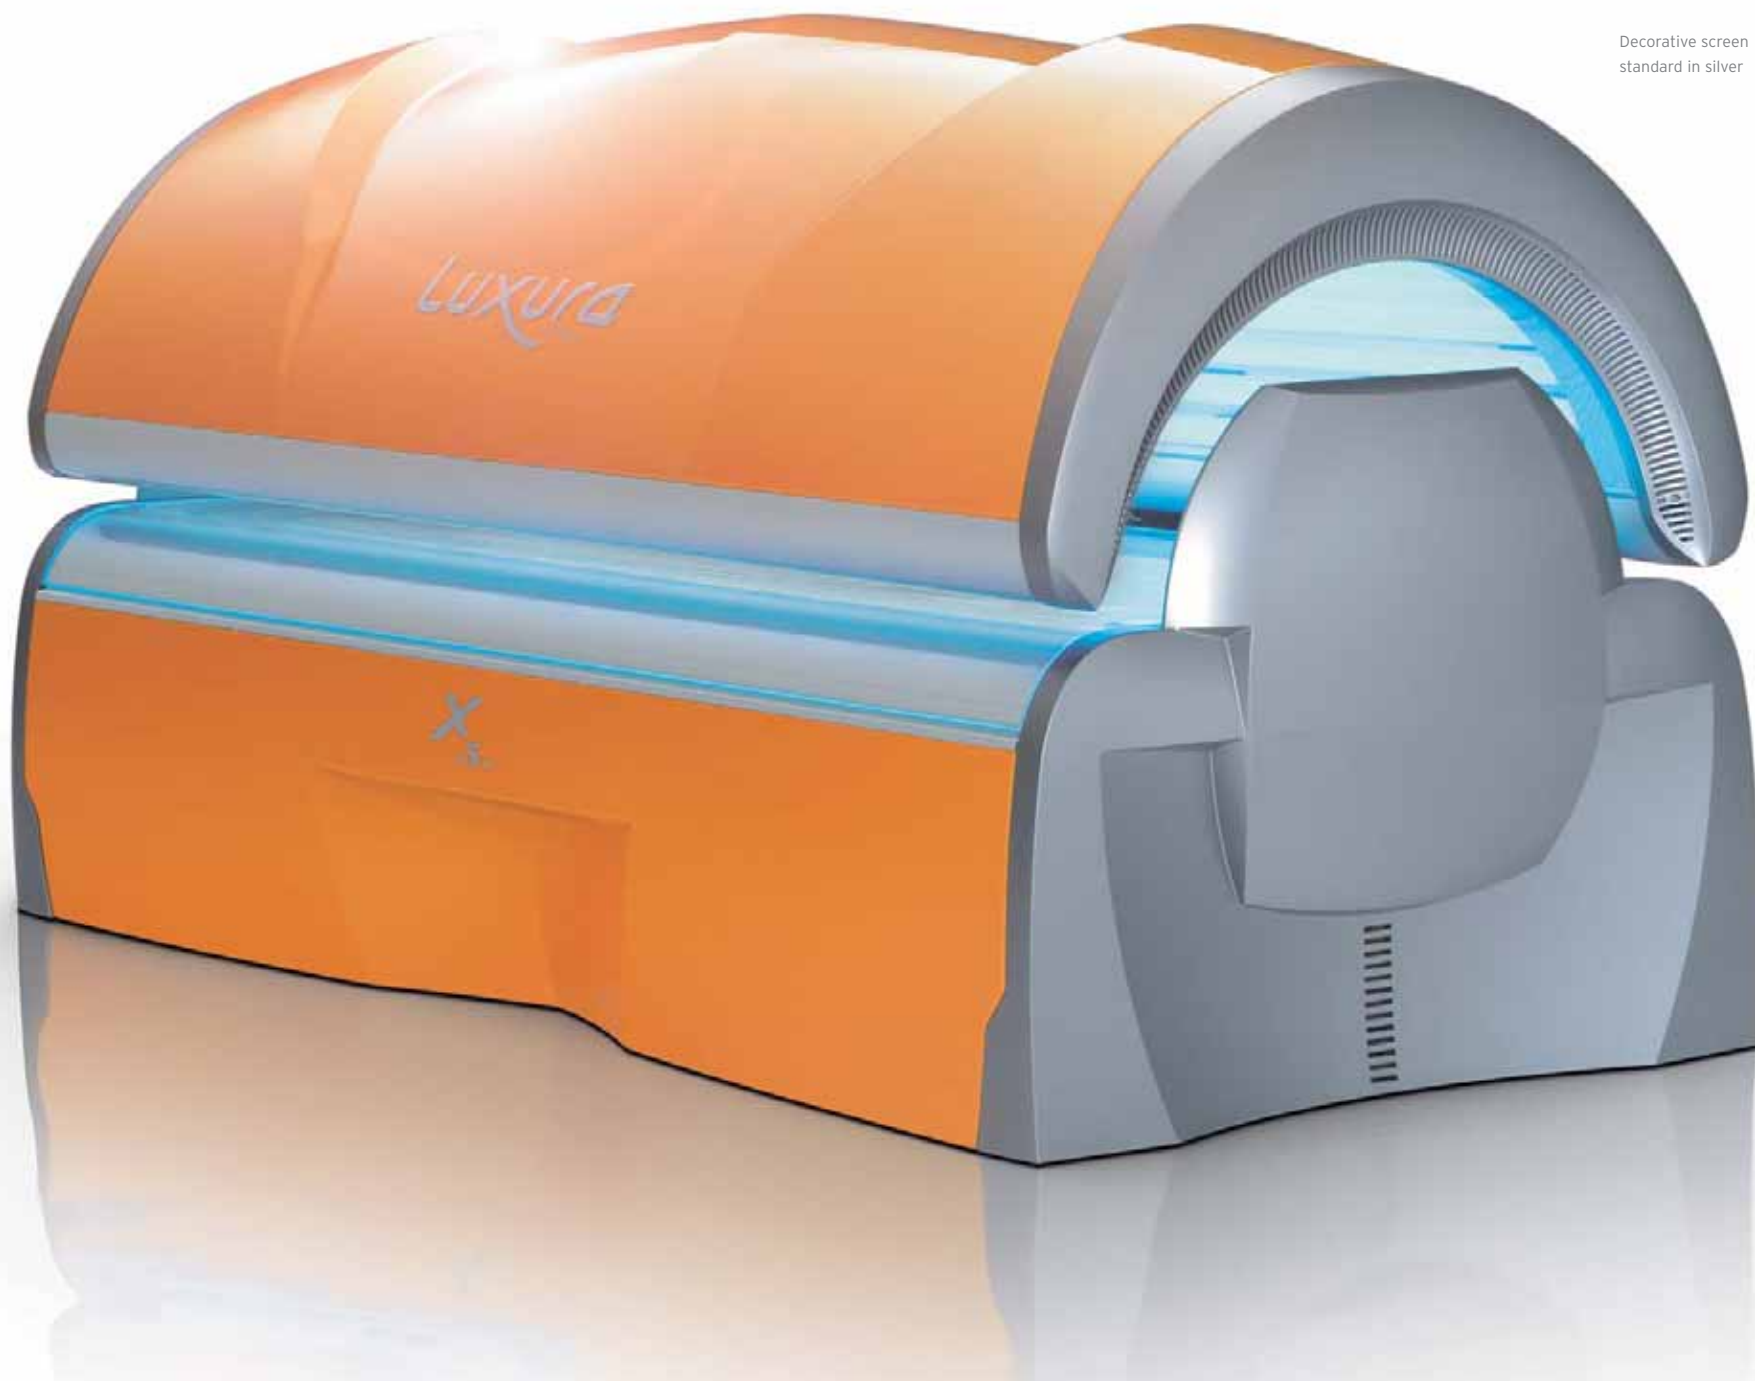

X₅

Luxura x₅: The All-Round Talent

Turn your Luxura x₅ into a sunbed with all the trimmings. Speakers, Sound Around, Smart Voice and myMP3 - there's hardly anything that can not be integrated with this all-round talent. BackFLEX shoulder tanner can also be delivered as well as an air conditioning unit, Xsens and Qsens*. Decorative screen between top and base and the face and body coolers are integrated as standard. Enter the premium class of sunbeds!

* Qsens can be delivered from May 2006 presumably.

Decorative screen
standard in silver

The perfect equipment for a perfect tanning result.

The LED blower decor light: an attractive attention grabber.

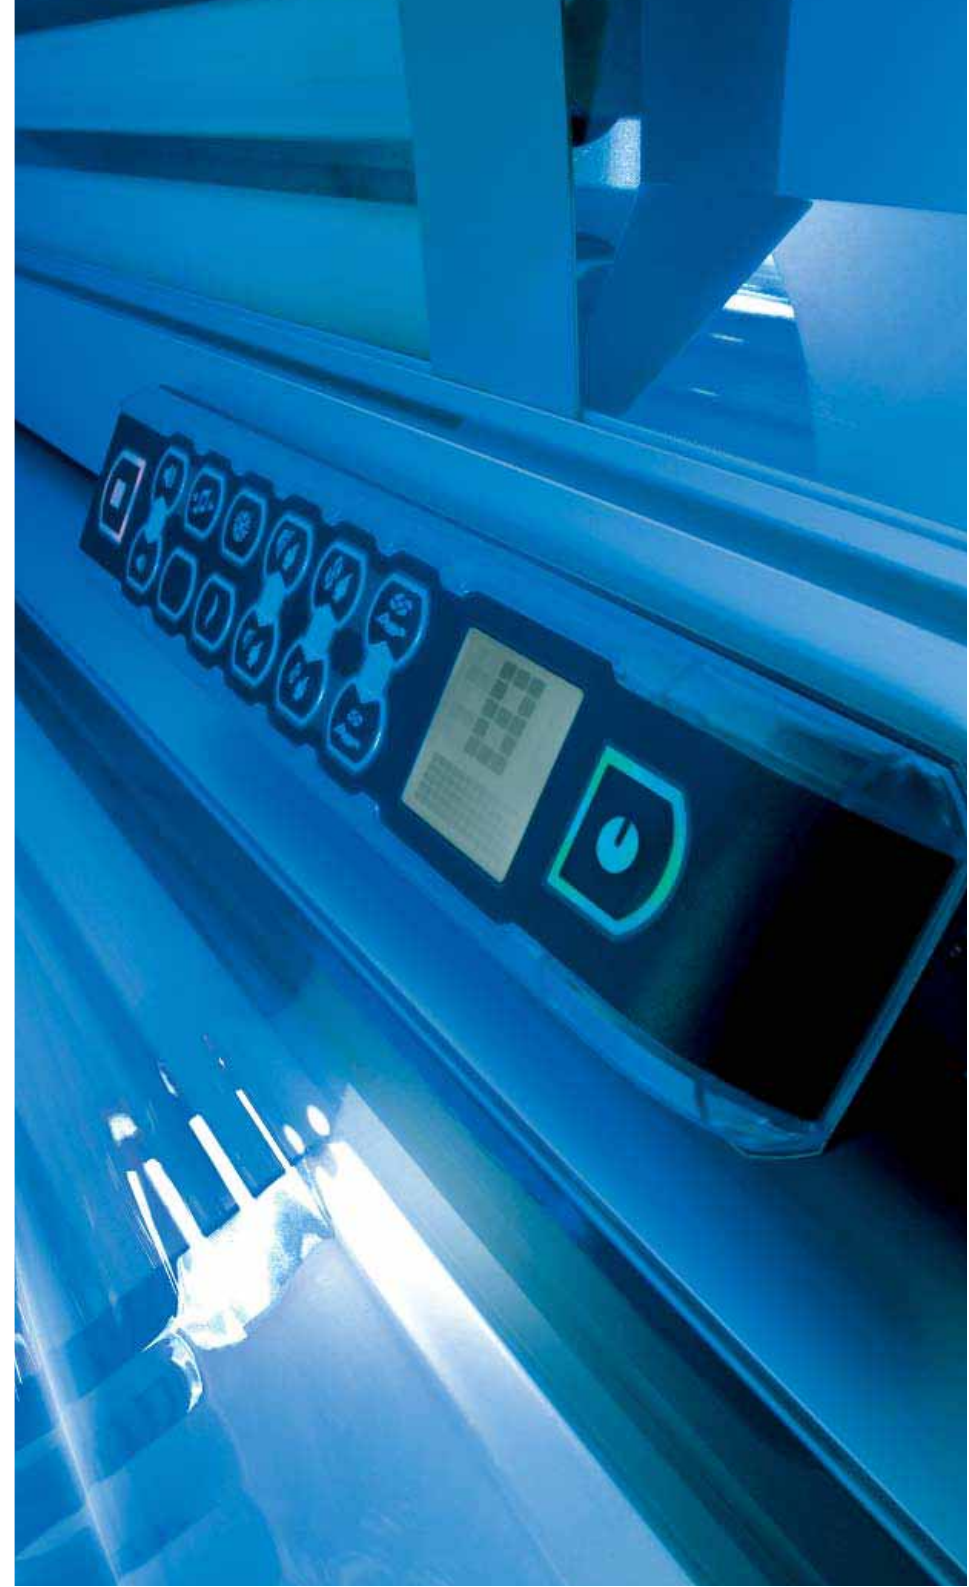

A woman with long brown hair, wearing a white, long-sleeved, flowing dress, is posing in a tanning studio. She is looking down and to the side, with her arms raised. The background is bright and out of focus.

Something Special

Even the standard features of the Luxura x₅ and Luxura x₇ are attracting admiring comments from the experts. There are a great many features that speak for the coherent Hapro brand concept. These include the striking inside lighting, the futuristic LCD display and the simple opening and closing mechanism. Visitors to tanning studios have found out - the Luxura x₅ and x₇ are really something quite special.

The functions at a glance - the setting at a „touch“. The multi-function display ensures simple handling.

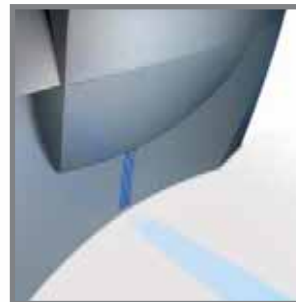

Harmony Out Of Form And Function

This is how an exemplary sunbed design looks: the first glance alone promises a special kind of tanning experience. And then there are the functional details! For example the face cooler. This can simply not be missing with a piece of equipment of this class. This is why Hapro has integrated it as a standard feature. The same applies for the body cooler. Both coolers can be regulated in five steps.

Another impressive detail: in the fan there are loud-speakers for the sound-around system - design all around.

X_S X_?

How About A Little More Comfort?

The human body has a contoured profile. It's outline is composed of a variety of curves. This is why the bed surface has been designed with an ergonomic profile, thanks to contourPLUS*. This turns a conventional acrylic bed into an oasis of comfort, tailor made to fit each individual shape. Once you have experienced contourPLUS, you will never want to do without it.

* Standard feature of the Luxura x₇ only; available as an option for the Luxura x₅

X2 SLi, equipped with optional HPS filters

High-Tech Light For Ideal Tanning

The many x_5 and x_7 variants tan with different light concepts. The range goes from 34 tubes (Luxura x_5) onto 38 and 40 tubes up to 42 tubes in the top model of the x_7 range. Generally you have the choice between SLi and SPr tubes in the versions „Intensive“ or „High Intensive“. The x_7 variants with 38 tubes have as standard a backFLEX shoulder tanner, the variants with 40 and 42 tubes have as standard XL-light, 2 m-technology in the base.

HPS - the High Power System - for more efficiency and more intensive tanning.

Light for the whole body: the 2 metre tubes for an ideal tan.

x_5 40 SPr

x_5 34 SPr

x_7 38 SLi

There's Music In There

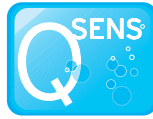

How would you like hot samba rhythms when tanning? Or gentle Mediterranean sounds? Or what do you think of calypso? The many features leave no music wish unfulfilled. All x₇ models are equipped with speakers*, and the 42-tube variant even has a sound-around system and a connection for MP3 players. Sun lovers can either insert their own MP3 player or select one of the four music channels in the studio. Sounds great, doesn't it?

* Optional for Luxura x₅

Fragrant scent is wafted into the interior through the ventilation system. Available in fragrances „Citrus“, „Exotic“ or „Ocean“.

A completely natural cooling experience. Refreshing water is sprayed into the room via the ventilation system. Presumably from May 2006 available.

More comfort thanks to the ergonomically shaped lying area which is ideally adapted to the body contours.

A friendly voice greets the users and guides them through the device functions with supporting information.

High Power System: Special filter in SLi face tanner provides, with its mirror reflexes, a top quality design, more efficiency and direct pigmentation.

In the integrated shoulder tanner the beams are diverted to the shoulders via reflection without any additional energy expenditure.

Air conditioning system for cooling the ergonomically moulded lying area. The users can switch this on and off as they choose.

Connection for a portable MP3 player. The user can connect his or her own equipment, or plug in a device provided by the studio.

2 m tubes in XL-format for a perfect tan.

4 integrated speakers in the head and foot area and a subwoofer ensure a three-dimensional sound experience.

EasyLift
Acrylic system

Simple handling, quick maintenance. The acrylic surface is removed and inserted again in an instant.

X_S X_?

Time Is Money

Cleaning equipment, replacing tubes, conducting technical services. All no problem. Hapro writes to its designers in the customer requirement specifications that they have to develop only such tanning devices whose maintenance requires no annoying time consuming assembly work. And this has been a perfect success once more again here. For example with the EasyLift Acrylic system. With this the acrylic surface can be removed and attached again very easily. Finally Luxura x₅ and Luxura x₇ should not give rise to any unnecessary expenditure but will lead to satisfied sun studio visitors.
